DETAILED ACTION

Claims 1, 5-16 are pending in the case.

Response to Amendment

Any rejection of record in the previous action not addressed in this office action is withdrawn. There are no new grounds of rejection that were not necessitated by applicants' amendment and therefore, this action is final.

Claim Rejections - 35 USC § 102

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 8-11, 15, 16 are rejected under 35 U.S.C. 102(a) as being anticipated by Sauer et al. (J. Biol. Chem. 279, 8, 6613-6619, Feb. 20, 2004).

Sauer et al. disclose and E. coli strain having the genes encoding a soluble transhydrogenase and phosphoglucose isomerase (see Table 1, strain Pgi-UdhA) (claim 1, 10, 15, 16). The strain inherently comprises at least one endogenous gene coding for an enzyme involved in the biotransformation of substances of interest, since said biotransformation reactions occur in any living cell (claim 8). The disclosed strain inherently comprises a gene which would meet the limitation of "selection marker gene" since any gene encoding an assayable gene product, such as prototrophy for an amino acid, would constitute a selection marker, and the E. coli cell contains such assayable gene product and corresponding encoding gene (claim 9). The reference discloses the method of preparing said strain comprising deleting a gene encoding a soluble

Art Unit: 1636

transhydrogenase and deleting a gene encoding a phosphoglucose isomerase (see Table 1, pages 6614-6615) (claim 11).

Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

Claims 5-7, 12-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
